		Subject: Beltway 8 - Building 1

Hi Lori:

I just wanted to report that I completed the walk-thru of Building 1 with Bobby W. and Jason and Larry with Panattoni Construction on Monday evening. There were only a very few minor items that I know Jason and Larry will address right away.

I also wanted to let you know - so that if you see Denny - you could pass on to him what a great job his guys did with that building and the property. The project looks great. As a side note the few "building issues" that we had at 550 Greens Parkway (i.e. water coming in under the front doors - when Houston gets one of their typical "gully washer" rains or the issue of planting the landscaping all the way up to the edge of the building and the bark mulch then bleeds onto the building and discolors it.) were addressed by the Panattoni Construction guys pro-actively.

It is nice when the interaction between the two companies - PPI and Panattoni Construction works - and the end result is an even better asset for the building owners. Just thought you would be interested.
